The 7:00am reading for 1,3-butadiene just came in at 32.17ppb. Wind from the east.

Subject: Update from stationary monitors

Good morning,

We're seeing some higher concentrations of 1,3-butadiene at Nederland High School this morning than the previous two days:
9.07 ppb and 10.60 ppb at 5:00am and 6:00am, respectively. Wind direction was from the east-northeast.
Still well below the odor and short-term thresholds.

Our operator was able to collect VOC canisters from all three area stationary monitors (Port Neches Avenue L, Groves, and Port Arthur West) and they were delivered to the air lab last night. They are being prepped for analysis. If no issues, should be able to get some preliminary results on Saturday.
